WYNK

An Ophthalmology EMR Software

Bring efficiency to your day to day operations

Wynk Ophthalmology EMR provides the right balance of evidence-based guidelines with the flexibility to customize your workflow to deliver a higher quality of care. Our ultimate aim is to enable electronic documentation for a quicker recovery, tracking of patient clinical history, viable treatment plan, and hence effectively convert the whole organization into a paperless eco-friendly environment.

Key Features

Wynk EMR helps physicians to access patient information, optometric details, digitize clinical and non-clinical workflow processes, facilitate doctors to concentrate on core activities instead of manual tasking. Wynk EMR also enables top management to analyze and track investments, expenses, and revenue. It helps organizations of all sizes manage their time more effectively by optimizing patient visits, increasing the accuracy and completeness of documentation.

- Improve care quality using standardized treatment plans
- Save time by eliminating redundant data entry with automated information capturing
- Develop patient and condition-specific treatment plans
- Utilize structured data for clinical trials and reporting
- Hassle-free maintenance with upgrades
- Recording clinic visits, assessments, investigations and ophthalmic procedures.
- Instantly review patient history and progression over time.
- Consolidate records and scan investigation images both manually as well as automatically from ophthalmic equipment.
- Establish periodic correspondence with patients and health care professionals.
- Report on activity and clinical outcomes.

Implementation of Wynk Ophthalmology EMR is easy, takes a minimal amount of time to learn and maintain. Our broad framework seamlessly connects your eye care organization and makes it digitally inclusive.

- Web-based application – Anywhere / Anytime access
- Increased staff performance and satisfaction

Why choose Wynk EMR as your partner?

Wynk EMR is designed exclusively for Ophthalmologists of various sub-specialties and provides service for practices all around the world. Our software has the provision to embed all the ICD codes, allowing Ophthalmologists to capture, submit and track changes electronically.

As an added advantage, WYNK connects administrative staff, optometrists, and doctors in a single platform and guides every single stakeholder with its extensive medical database of patient's information, diagnosis, histories, ocular structures, clinical procedures, examinations, treatment plans, prescriptions, and billing.

Wynk EMR gives practice managers and providers complete control over how they engage with their patients. With Wynk EMR, your staff's can:

- Centralize patient information from the first encounter.
- All patient details, including billing history can be updated in real-time.
- Identify the location and status of each checked-in patient.
- Setup automated appointment reminders to be sent to patients via SMS, Email.
- View medical histories of patients without any hassle.

With Wynk EMR, Ophthalmologists can easily import and share Ophthalmology specific content such as automated refraction measurements like Visual Acuity, Optical Prescription, Squint Details, Intra Ocular Pressure, etc., with other physicians. Our software seamlessly integrates with other diagnostic software and devices allowing doctors to access patient information, perform external eye examinations, slit lamp examinations, fundus examinations, perform vision checks and eye diagnostics and thereby ensure smooth clinical workflow. Additionally, integrations with Optometric devices enable vision checks to be more accurate.

Personalized Dashboards

Wynk EMR helps staff to manage daily tasks with personalized dashboards. Customized according to individual's preferences, these dashboards provide ongoing visibility into every aspect of your practice operations, review tasks or assign to other users and monitor key performance indicators

Excellent drawing support

To support physicians, Wynk EMR has inbuilt drawing utility. Consultants can make use of this tool to capture patient conditions in a better way.

Specialty Focused

Wynk EMR provides a rich clinical template library for single and multi-specialty eye practices. Our technology is specialty-specific and template-driven to ensure accurate, complete, and efficient documentation. Our efficient report system stores Operative complications & treatment data for various observations. From surgery admission to discharge summary, you have complete access to your surgical information – all under one roof.

Security

As the Eyecare industry deals with sensitive data, Wynk EMR ensures personal information is secured and protected. Our security framework permits you to control who has access to the information in the application and how they utilize it.

"Centralize your work flow with one click"

Device Interface

Wynk EMR can be interfaced with devices like OCT, Fundus camera, Scanner and many such equipments.

Billing

Wynk EMR's Billing Service is an end-to-end revenue cycle management solution that eliminates revenue leakages by streamlining the entire workflow and helping the organization optimize revenue collection.

Inventory

Wynk integrated inventory management helps practices efficiently manage stock, dispense and sell medications, vaccines and much more. Our inventory management solution promotes revenue growth by increasing stock levels of high-demand products while reducing costs associated with supply chain management.

Multi-location practices can enjoy benefits available to central inventory and supply chain management. Our advanced settings maintain and manage batch-wise tracking of Receipts & Issues and Stock Status. Wynk EMR maintains pharmacy and optical inventory to know the actual stock position at various locations.

Alert Engine

One of the strongest features of Wynk EMR is its Alert Engine that can be configured to generate alerts when an identified event occurs.

Document Management

Patient documents such as scans, previous reports, paper charts, clinical images, photographs, x-rays, audio files, medical drawings and other documentation can be uploaded in Wynk EMR and reviewed for later use.

Improving Customer Service

- Accurate, comprehensive medical reports in a single click
- Digitized prescriptions for medicines and glasses
- Shorter waiting time for patients
- Personalized SMS alerts
- View reports and status of any center, anywhere, anytime!
- Enabling better efficiency in patient flow in centres.
